Maximum octane Perform over Maximum Octane Customizer Set maps for different types of fuel. Minimalist Design - The interface is very clean and only shows information needed at the moment you need it. Full. R2R - Hazardous Mode -. Hello everyone, I downloaded your dmg file and opened it and it was empty. Is this the.Q: Amazon ec2 build fail - dependency issue I have created an amazon free tier ec2 instance which is running in latest version of Ubuntu 12.04 64bit. I was trying to install and build a sample code i got from git repo.I got dependency issue related to lm-sensors.So I configured the installation steps and followed them.During configure and build process it throws "error: Package required by XXX not found in" I didn't find any solution to this.I read about it in a post (I tried adding PKG_CONFIG but it was not accepted. I tried also running pkg-config --modversion lm-sensors but it gave me a version number rather than a name. Following are the error messages i am getting make: *** [all] Error 2 ERROR: `make' failed I did not find any solution and i am stuck. Any help will be appreciated. A: You have to install lm-sensors before compiling your software. The error is pretty clear: The real problem is that you haven't installed lm-sensors. The problem is that package names in ubuntu are of the form "foo-version_from_debian_stable-ubuntu" and "foo-version_from_debian_unstable-ubuntu" The hard coded PKG_CONFIG variables lm-sensors and lm-sensors-dev are what you are seeing. If you want to see what version of lm-sensors was installed in your system type: dpkg -l lm-sensors* Senate Republicans unveiled an aggressive plan Friday to rein in the number of uninsured Americans, suggesting a series of provisions to help keep insurance companies from increasing premiums and adding deductibles and co-pays on 82157476af
